SUMMARY

QA Automation Engineer (SDET) with 3+ years of experience across SaaS, fintech, and telecom. Builds Playwright test automation that runs in CI/CD, creates internal tools that speed up test execution, and validates APIs and databases for data integrity. Experienced in testing AI-powered products, including LLM chatbots, for accuracy, hallucinations, and safe behavior. Works AI-first, using Claude Code and coding agents to build and maintain test suites.

TECHNICAL SKILLS

Test Automation: Playwright, Cypress, Selenium, Appium, Page Object Model (POM)
Languages: JavaScript, TypeScript, Python, SQL
API & Performance: REST API Testing, Postman, Newman, Performance Testing (K6, JMeter)
AI & LLM Quality: LLM Evaluation & Chatbot Testing, Prompt Engineering, Claude Code, LangChain
CI/CD & Tools: GitHub Actions, Git, GitHub, PostgreSQL, MySQL, JIRA, Click Up, Azure Boards
Methods: Test Planning, Test Strategy, Risk-based Testing, Shift-left, Regression, Smoke, UAT, SDLC/STLC, Agile/Scrum

EXPERIENCE

Software QA Engineer — SDS Manager *Aug 2025 – Present*
Dhaka, Bangladesh | B2B SaaS platform for chemical safety compliance

- Built and maintain the Playwright + JavaScript automation suite (POM) for E2E and cross-browser testing; its smoke tests run automatically in the CI pipeline on every build.
- Tested Safety Data Sheet (SDS) authoring and chemical management workflows, catching compliance-critical defects across 7 international regulations through API (Postman) and database (PostgreSQL) validation.
- Own selected features end to end in a product-owner role: define requirements and design, then drive them through build, testing, and release.
- Tested AI-powered product features, including an LLM chatbot, for response accuracy, hallucinations, off-topic or unsafe answers, and consistency across repeated prompts.
- Built an internal test case management tool and Claude skills that automate bug reporting, standups, and QA research.
- Diagnosed CI-only test failures, including configuration drift between local and pipeline runs and UI timing races, and stabilized pipeline results.
- Mentor two junior QA engineers in test design and automation.

Product Acceptance Analyst — SELISE Digital Platforms *Oct 2024 – Jul 2025*
Dhaka, Bangladesh | Fintech and microfinance platforms

- Initiated the team's Cypress automation framework with a reusable Page Object Model (POM) architecture.
- Tested fintech and microfinance platform features end to end across browsers, executing 100+ test cases per release in functional, regression, and UAT scope.
- Validated 50+ REST API endpoints in Postman across microfinance transaction flows, checking business logic and data integrity.
- Streamlined defect reporting in Azure Boards, shortening developer turnaround on critical bugs.
- Overhauled test documentation practices, improving release traceability across the team.

Software QA Engineer (Contract) — Banglalink (Under Response Ltd) *May 2023 – Sep 2024*
Dhaka, Bangladesh | One of Bangladesh's largest telecom operators

- Tested the company's self-care mobile app (Android and iOS), website, and e-commerce store across 10+ functional modules.
- Validated a production AI chatbot's responses against expected intents and behaviors: hands-on LLM quality testing on a telecom product serving millions of users.
- Executed full regression, sanity, and UAT suites each release cycle and managed the defect lifecycle in JIRA with developers.

Operation ERP System Intern — Dewhirst Shanta *Jun 2022 – Sep 2022*
Dhaka, Bangladesh

- Supported functional testing of ERP modules, identifying and reporting system defects.

PROJECTS

APITrek — Live | GitHub

- Live REST API testing workspace for structured API tests, with an endpoint coverage scorecard.

QA-Genius — Live | GitHub

- AI QA workspace turning user stories into test cases, bug reports, and test scripts (LangChain, Gemini).

Playwright Web Automation — GitHub

- Playwright + JavaScript UI test suite with Page Object Model and GitHub Actions CI on every push.

EDUCATION

BSc in Computer Science and Engineering — City University, Dhaka (Apr 2018 – May 2022)

CERTIFICATIONS

- Anthropic Model Context Protocol (MCP) — Anthropic
- Career Essentials in Generative AI — Microsoft & LinkedIn Learning
